

InflatorShield™ – Inflatable Incursion Deterrent

FAST. VISIBLE. EFFECTIVE.

The InflatorShield™ is a quick, easy and efficient solution for road closures and airlock systems. Each unit is 3.5m long, enough to close a full lane on its own, and multiple units can be connected in a run to seal off an entire carriageway. Once inflated, units stay firm for as long as required and won't deflate unintentionally. Quick-release zips allow rapid deflation when time is critical.

- › **Rapid deployment** – inflates in minutes
- › **High visibility** – bold reflective chevron face
- › **Modular design** – link multiple units together
- › **Lightweight & portable** – easy to transport & position
- › **Quick deflation** – fast removal when required

IDEAL FOR

- › Lane closure setups
- › Road closure environments
- › Airlock systems
- › Temporary traffic management
- › Highways maintenance works

DESIGNED FOR REAL-WORLD USE

- › Integrated ballast trays (front & rear) – please see “IMPORTANT” section
- › Compatible with sandbags, fence feet, and other weights
- › Reinforced base for durability
- › Drainage eyelets to prevent water build-up
- › Connection clips for continuous runs

MAXIMISE VISIBILITY & PRESENCE

- InflatorShield™ creates a **strong visual presence** to:
- › Increase driver awareness
 - › Discourage unauthorised access
 - › Support safer working environments
 - › Assist with compliant site setups

FLEXIBLE DEPLOYMENT

- › Use as a single unit or
 - › Connect multiple units to form a continuous visual line
- Adaptable to a wide range of site layouts and traffic management requirements.

TARMAC
Tarmac Safety Innovation Highly Commended at Industry Awards

Keeping our workforce and road users safe will always be our highest priority and its fantastic to see such a positive innovation developed by our team delivering clear safety benefits and being recognised by the wider industry.

An inflatable safety barrier designed by Tarmac has been highly commended at the Chartered Institute of Highway & Transportation (CIHT) awards.

The innovation which was awarded the award at the CIHT Awards and Highway England was recognised as the CIHT's New Road Safety concept. The winning innovation is the InflatorShield™.

The innovation, designed by Tarmac, is a portable, inflatable barrier which is easy to set up and can be used to create a safe working environment. It is made from a lightweight, durable material and is easy to transport and store. It is also highly visible and can be used in a variety of situations.
